Bluetooth Speaker Charging

Rechargeable Battery is built-in in Bluetooth Speaker.

1. That Bluetooth speaker is in a 100% charge state is suggested before initial using.
2. Insert the plug of charge to the charging hole of Bluetooth speaker, and then have the charge combined to power AC or PC.
3. The indicator light will be on in a charging state, and the indicator light will be off after finishing.

Only the charge with 5V DC or USB for computer can be used

Bluetooth Speaker Turned on

- 1、 Make sure the battery with 100% charge state.
- 2、 Pair the Bluetooth speaker with mobile phone or PC which Bluetooth is on.

Indicator Light

State of Bluetooth Speaker	State of Indicator Light
The Standby	Blue Flash
Charge	Red on
Full charge	Red off
TF Card Model	Blue with slow flash (just for Bluetooth Speaker with TF Card)

Pair Bluetooth Speaker with Mobile Phone

1. Be sure the Bluetooth Speaker is on.
2. Turn on the Bluetooth of mobile phone and search the devices with Bluetooth ;then the match name with "Myvision" is chosen . Click the word "pair" and "Pair successfully" will be announced.

How To Use the Bluetooth Speaker

1."M" Button : Press the button for 3 seconds as this function of hand gesture recognition is implied "off". It will be next song if from left to right;in contrast,it will be the last song .That from down to up stands for "Pause",of course, that from up to down is "Play".

2."M" Button: Transform modes (Bluetooth Mode/TF Card Mode/Line-in Mode) is just to be pressed for a short time. "Bluetooth Model "is implied. Insert a piece of TF card ,it will be automatically transferred to the TF card mode; the Line-in Mode will be on when line is combined.

A. Volume Button: Touch " " is for "Volume Down", " " is for "Volume

Up".(Transforming Between Chinese and English for this two button same time 3 second pressing)

B. Call on/off: the button is for "Pause"or"Play" when it is pressed for a short time.When call is coming, it is also for "Call"or "Hang up".Long press is for On/Off.

Remarks with using Bluetooth Speaker

1. The furthest range is 15cm when the function of hand gesture recognition is effective.
2. The best range is 50cm if you have a call with Bluetooth Speaker.
