The main interface, can be divided into 5 parts, each of the corners and the main body of the screen. In the main of the screen are housed icons and widgets that the user wants, capable of being moved to the left (2 screens) or right (2 screens) thus has a total of 5 screens that can be added shortcuts, bookmarks and Widgets.

The upper left corner: can either perform a Google search by typing the desired look or do a search for voice (in either case must be connected to the Internet).

The upper right corner: access to applications and installed Widgets.

Applications are programs that run when the user wishes and stop working when the user exits the application. They can be installed by downloading the application Google Play or through websites that offer Android applications.

Widgets are small easy access programs that run continuously, they are located in any of the main screens. For example one of the widgets that are already installed and running is the analogue clock.

There are 4 navigation icons:

Allows to go back.

Go to the main screen.

View and select the applications that are currently running.

Access the menu depending on the application you are using. If you are in the main interface will pop up a menu that lets you change the wallpaper, manage applications or access the system settings.

In the top area is the status area:

showing the current

time, battery status, wireless connection, different alarms and status messages.

By clicking you can access some quick adjustments.

Accessing the area of applications and widgets you can manage the main interface icons:

Press and hold an icon 3 seconds after the icon is enlarged, you can drag it anywhere on the interface

Delete icons: long press the icons 3 second, drag the icons to the Recycle Bin icon, once

it become red, Loosen your hand, after that you can delete icon.

You touch the screen keep a time, appear the dialog box "Add you Home screen" as shown below:

5. Problem solution

The tablet does not start or does not show image

Check battery. Connect the charger DC power connector of your device and wait. If the battery is completely depleted, charging 4-5 hours will be enough to take autonomy.

Can't play videos that you can actually play on your computer

Just as we need to install codecs in a computer to reproduce some extensions and video formats, the tablet works the same way. Access Market and locate the codec application you're interested in.

The tablet boots and freezes with the word Android on screen but doesn't get to the unlock menu

It is possible that some recently installed application isn't ready to be used in the tablet or it may be consuming too much work memory. Enter the download area in Talius website and look for the original firmware and your model's guide to restore your Android system from your computer.
